

Arief Ridzki Darmawan

Computer Science Undergraduate

ariefridzki@gmail.com · +62 821 1460 1824

Summary

Computer Science undergraduate interested in software engineering, UI/UX design, and game development. Experienced in visual design and creative leadership across student organizations, with hands-on experience building web, mobile, and game applications through academic and collaborative projects. Passionate about creating intuitive user experiences while continuously developing practical software engineering skills.

Education

University of Indonesia

Bachelor of Science in Computer Science

Aug 2023 – Present (Expected 2027)

SMAN 8 Tangerang

Senior High School Diploma in Natural Sciences

Jul 2020 – May 2023

Projects

SIKAYU

2026

Django, Python, SonarQube, TDD

- Contributed to the continued development of KAYU, an internal Fasilkom UI platform for applying graduation and academic monitoring.
- Implemented enhancements to the graduation review module, including cum laude eligibility summaries, elective credit reporting, and standardized academic period formatting based on UAT feedback.
- Improved the graduation export workflow, updated UI components to match the latest design system, and reduced code smells using SonarQube.

Pollutechnician

2026

Godot, GDScript, Aseprite

- Developed a 2D resource management game featuring a state-driven game loop, dynamic pollution simulation, machine degradation, and randomized gameplay events.
- Engineered gameplay systems including a repair QTE minigame, upgrade and economy systems, an interactive shop, and player progression mechanics.
- Designed and integrated customized 2D assets while implementing UI, player controls, and core gameplay systems.

HiringGo

2025

Java, Spring Boot, TDD

- Developed the Job Vacancy Management module, implementing vacancy creation, listing, and student registration workflows.
- Built controller and service layers following RESTful design principles, including standardized HTTP responses and request handling.
- Applied the Builder pattern, practiced Test-Driven Development (Red-Green-Refactor), and wrote unit tests for controllers and services.

SIJARTA

2024

Django, Python, PostgreSQL

- Developed features for a multi-role home services marketplace as part of a Database Systems project.
- Designed database schemas, populated relational datasets, and implemented SQL CRUD operations for bookings, vouchers, discounts, testimonials, and order status management.
- Built backend functionality without using Django ORM, emphasizing relational database design and SQL development.

Picket

2024

Django, Python, Burp Suite, Figma

- Designed the application's design system and implemented the user profile feature.
- Conducted threat analysis and security testing using Burp Suite as part of a software security assessment.
- Collaborated on the development of a secure airline ticket booking platform.

EventYog

2024

Flutter, Dart, Django

- Developed an administrative dashboard for managing user accounts.
- Implemented CRUD functionality for account administration across the Flutter application.
- Collaborated on the development of a cross-platform event discovery application.

What The Dog Doin’

2026

Godot, GDScript, Aseprite

- Led the game’s visual production by creating and integrating 2D assets into the game world.
- Assisted in gameplay programming and feature implementation using GDScript.
- Collaborated with teammates throughout the design and development of a game development course project.

Experience

RISTEK 2026

Feb 2026 – Present

Lead Artist, Game Development SIG

- Mentor junior members through internal classes on digital art and game asset creation.
- Collaborate with programmers, designers, and artists to develop games for competitions.

BETIS 2025

Oct 2024 – Jun 2025

Expert Creative Staff

- Designed visual content for social media and organizational communications.
- Designed merchandise and internal organizational materials supporting programs and events.

FUKI 2024

Jun 2024 – Apr 2025

Expert Creative Staff

- Created visual assets for social media and organizational activities.
- Designed internal materials, including pitch decks and other organizational resources.

BETIS 2024

Jan 2024 – Nov 2024

Creative Staff

- Produced visual content for social media and promotional campaigns.

COMPFEST 16

Dec 2023 – Jan 2025

Expert Visual Design Staff

- Contributed to the development of design guidelines and visual standards for the organization.
- Reviewed design deliverables and provided feedback to maintain visual consistency across team outputs.
- Collaborated with cross-functional teams to ensure clear and consistent visual communication.
- Designed merchandise, promotional materials, and internal organizational assets.

Skills

Programming Languages: Python, Java, Rust, Dart, JavaScript, GDScript

Frameworks & Technologies: Django, Spring Boot, Flutter, PostgreSQL

Software Engineering: Git, REST APIs, Test-Driven Development (TDD), SonarQube

Design & Creative Tools: Figma, UI/UX Design, Aseprite, Digital Illustration, Video Editing

Security: Burp Suite
